

Take Five!

The newsletter of the First Coast Wind Ensemble

September, 2007

Volume III, Fall

Welcome to the 18th season of the First Coast Wind Ensemble. A very busy and exciting year awaits us - - check out our 2007-08 concert calendar! Also in this edition of Take Five, we feature the trombone section of the wind ensemble. Recognize the musicians, the instrument, and the varied professions they represent. We hope to see you at our concerts and would love to personally meet you following any performance. Please come up and say hello!

TROMBONE FACTS

Mouthpiece
Cup-shaped with wide rim.

Did you know...

Funnel-shaped bell

The name trombone is derived from the Italian tromba (trumpet) and one (large) – which is exactly what the trombone is - - a large trumpet. ...

THE SACKBUT is an early trombone that dates from about 1490. It was mainly used as part of the standard military or brass “outdoor” band. The sackbut became known as the trombone in the 18th century, and was used by operatic composers and in military bands. Apart from differences in the bell and bore, the trombone has changed little since the 15th century.
